Re: References on services of SKRIVANEK SLOVENSKO s. r. o.

FANUC Robotics offers a wide range of industrial robots as well as complete robotic systems. Our company has been collaborating with Skrivanek Slovensko, s.r.o. in the area of translation services since the year 2004. Due to the type of our activities we require specialized technical translations with French and English as source languages.

We have decided to collaborate with Skrivanek Slovensko, s.r.o., as the company has many years of experience and good market reputation. During the commission realization we came across helpfulness and willingness to meet our requirements for translation content and graphical processing. Due to the large volume of our commission we mostly appreciate flexibility of completing the translation in express deadline.

Thanks to professional approach and high quality work we plan to further collaborate with Skrivanek Slovensko and we recommend the services of Skrivanek Slovensko to other companies.
